

Project Design Phase-II

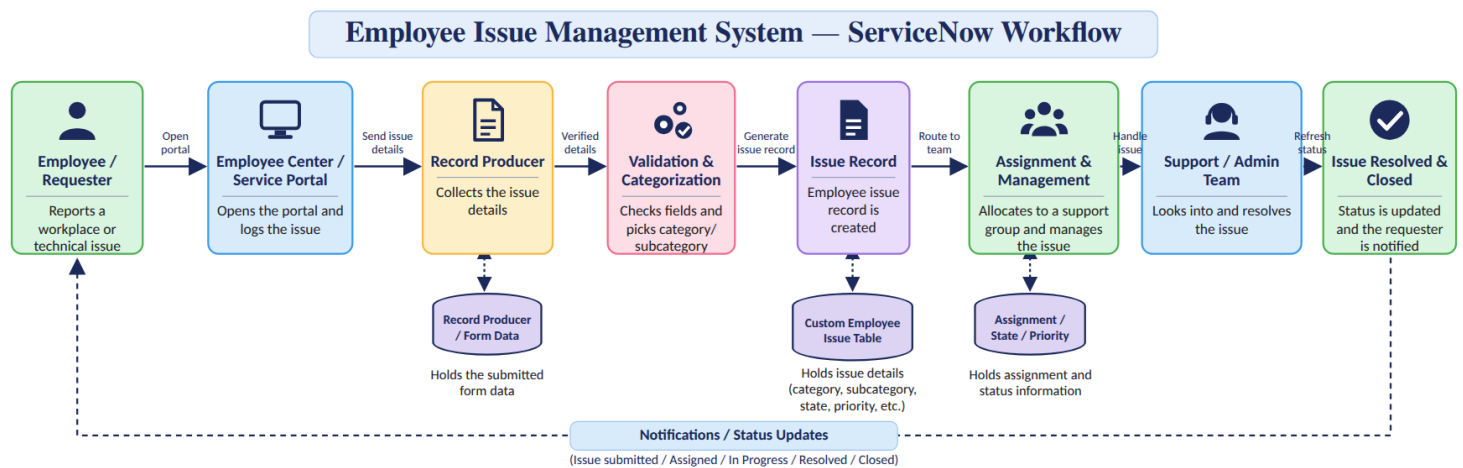

Data Flow Diagram & User Stories

Date	11 September 2026
Team ID	Individual
Name	Mohammad Naheed Jahan
Project Name	Employee Raise Issue – Record Producer & Service Portal Integration
Maximum Marks	4 Marks

Data Flow Diagrams:

The Data Flow Diagram illustrates how a software installation request travels through the ServiceNow system, starting with the employee's submission and continuing through approval and IT fulfillment.

DFD Level 0 – Software Installation Request Automation

Source / Actor	Process / System	Data Flow	ServiceNow Table / Record	Output / Next Step
Employee / Requester	Employee Center	Issue description, category, subcategory, requester info	Record Producer / Custom Issue Record	Issue submitted
Employee Center	Record Producer	Issue information submitted	Record Producer	Issue data collected
Record Producer	Validation & Categorization	Category, subcategory, required fields	UI Policies / Dependent Choices	Issue information verified
Validation & Categorization	Issue Record	Verified issue details	Custom Employee Issue Table	Issue record generated
Support / Admin	Assignment & Management	State, priority, assignment group	Custom Employee Issue Table	Issue assigned and monitored
Support Team	Issue Resolution	Resolution details and status	Custom Employee Issue Table	Issue resolved and closed

Data Flow Summary:

Employee → Employee Center → Record Producer → UI Policies & Dependent Choices → Custom Employee Issue Record → Assignment / Issue Management → Support Team Resolution → Issue Resolved & Closed

User Stories

The user stories below outline the functional requirements for the Employee Issue Management System project.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Employee (Requestor)	Issue Submission	USN-1	As an employee, I can open the Employee Center and report a workplace or technical issue.	The employee can reach the issue submission option and open the issue form without errors.	High	Sprint-1
Employee (Requestor)	Issue Submission	USN-2	As an employee, I can enter the necessary issue details, such as category, subcategory, and description.	Once the required fields are filled in, the issue is submitted successfully.	High	Sprint-1
Employee (Requester)	Issue Categorization	USN-3	As an employee, I can choose a suitable category and subcategory for my issue.	Matching subcategories appear based on the chosen category, and the selected values are saved correctly.	High	Sprint-1
System / ServiceNow	Data Validation	USN-4	As the system, I can check the information the employee enters by using UI Policies and mandatory fields.	Mandatory fields are enforced, and incomplete or invalid submissions are blocked.	High	Sprint-1
System / ServiceNow	Record Creation	USN-5	As the system, I can generate an employee issue record from the submitted information.	A unique issue record is generated with the requester, category, subcategory, description, and other required details.	High	Sprint-1
Support / Admin	Issue Management	USN-6	As a support/admin user, I can allocate an issue to the right support group.	The issue can be allocated to the correct group, and the assignment details are saved successfully.	High	Sprint-2
Employee (Requestor)	Request Tracking	USN-7	As an employee, I can follow the status of the issue I submitted.	The employee can see the current status of the submitted issue, such as New, In Progress, Resolved, or Closed.	Medium	Sprint-2
Employee (Requestor)	Notifications	USN-8	As an employee, I can get updates about significant changes to my issue.	The employee receives the relevant status or resolution updates whenever applicable.	Medium	Sprint-2
